

"D" is used to ascertain the width required between the mudguards. Please supply the boat width at top of mudguard if on existing trailer.

Please circle which hull style suits your boat.

Dimensions for moulded (part of the hull) platforms are generally taken from position 1.

Dimensions for bolt on / fold down platforms are normally taken from position 2.

Please clearly mark the position either 1 or 2 where you have taken your measurements from as this will determine the rear of your trailer.

Ensure both A and C are measured from this same position.
